

Company: Deloitte
Role: Data Analyst
Difficulty: Medium
Round: All Rounds

Overall Experience:

Case Study Round: Analyze a sales dataset, identify trends and anomalies, and present business recommendations to a mock client.

Focus on communication, structuring your analysis, and business acumen.

Technical Round: Advanced SQL queries using window functions (ROW_NUMBER, RANK, LEAD, LAG) and Common Table Expressions (CTEs).
Basic statistics questions - p-value interpretation, hypothesis testing, correlation vs causation, and A/B testing methodology.

Tips: Deloitte values business acumen alongside technical skills.

Practice end-to-end data storytelling with visualizations.
