

Company: Microsoft
Role: SDE Intern
Difficulty: Medium
Round: All Rounds

Overall Experience:

Online Coding Round: Three questions on strings and arrays. One was to find the transition point in a b

Technical Round 1: Implement a binary search tree with insert, delete, and search operations.
Discussed AVL and Red-Black tree balancing strategies. The interviewer asked about height-balanced

Technical Round 2: Find the longest palindromic substring. I started with a brute-force approach,
optimized it to $O(N^2)$ using dynamic programming, and then discussed the expand-around-center app

HR Round: Questions about Microsoft culture, Azure cloud architecture basics, and project details.
They wanted to see enthusiasm and alignment with Microsoft's growth mindset.
